

# ZOMLION TECHNOLOGY WITH INGENUITY AND CARE

## The world's leading excavator intelligent manufacturing factory

Zoomlion Smart City Earthmoving Machinery Park is an industry-leading intelligent and flexible excavator factory. From a piece of steel plate to an excavator, with high-precision welding process, highly reliable assembly process, high-level coating process and strict quality control, each excavator is delivered with ultimate quality.

Zoomlion Heavy Industry Science & Technology Co.,Ltd.

# ZOMLION 37-TONNAGE CRAWLER HYDRAULIC EXCAVATOR

ZE335G  
ZE375G

## EXCELLENT PRODUCT

### POWERFUL AND ENVIRONMENTALLY FRIENDLY

EU Stage V  
Three-speed idling  
ZOMLION E-COT positive flow hydraulic control system

### COMFORTABLE CAB

Suspension seat  
Large touch screen  
Detail-oriented comfort design

### HIGH ROI

Increased productivity  
Reduced idle time of equipment  
Higher hydraulic system efficiency  
Lower maintenance cost

### SAFETY

ROPS&FOPS cab  
**Engine power :**  
**ZE335G :**  
**209 kW @ 2100 rpm**  
**ZE375G :**  
**242 kW @ 1800 rpm**

### Operating weight:

**ZE335G :**  
**33500 kg**  
**ZE375G :**  
**37500 kg**

### Bucket capacity:

**ZE335G :**  
**1.6~1.9 m<sup>3</sup>**  
**ZE375G :**  
**1.9~2.2 m<sup>3</sup>**

#### Load analysis

- 1. Improvement of heavy load efficiency
- 2. Load abrupt change technology

#### Load matching

- 1. RSC swing control technology
- 2. BPR regeneration control strategy

#### Torque matching

- 1. Positive flow constant power control model
- 2. Variable speed curve application

#### Flow analysis

- 1. Two-pump separate power volume speed regulation technology
- 2. Multi-mode power control technology application

#### HIGH PRODUCTIVITY

ZE335G&ZE375G are powerful and agile. They adopt ZOOLION E-COT positive flow hydraulic control technology. The high-power engine provides sufficient power for the operation, and the control system elaborately tuned by ZOOLION brings fast response.

#### LOW IDLE RATE

ZE335G&ZE375G are equipped with a 650L fuel tank and a customized 58L DEF tank, which reduce the time wasted for refueling and DEF filling and realizes long endurance. Moreover, the consumption percentage of DEF is synchronized with that of fuel.

#### LOW FUEL CONSUMPTION

ZE335G&ZE375G realize fuel saving through the three-speed idling function, in which the high engine speed gradually decreases to 900 rpm if the machine is not operated for certain time.

#### EXCELLENT HYDRAULIC SYSTEM EFFICIENCY

ZE335G&ZE375G adopt the multi-valve spools dynamic control technology and main pump flow dynamic matching technology, which makes the machine operation smoother. The flow of the main pump is adjusted through the working load to make the hydraulic system in the optimal working state, so as to achieve both excellent controllability and low fuel consumption.

ZE335G&ZE375G adopt a positive flow control system independently developed by ZOOLION. With the application of the load analysis, load matching, flow analysis and torque matching technologies, the work efficiency of large-scale digging and loading operation is improved while the fuel consumption is greatly reduced, creating value for customers.

Type	Density of applicable materials	ZE335G	ZE375G	ZE335G	ZE375G
Reinforced bucket	$\leq 1500\text{kg/m}^3$	$1.9\text{m}^3$	$2.2\text{m}^3$	$1.6\text{m}^3$	$1.9\text{m}^3$
Rock bucket	$\leq 1800\text{kg/m}^3$	$1.6\text{m}^3$	$1.9\text{m}^3$	Weight	1690 kg
				Width	1400 mm
					1665 mm
				ZE375G	
				$1.9\text{m}^3$	$2.2\text{m}^3$
				Weight	1930 kg
				Width	1665 mm
					1750 mm

## REINFORCED BUCKET

Standard high efficient reinforced bucket of  $1.9\text{m}^3/2.2\text{m}^3$  capacity;  
Loading efficiency is high because soil is hardly stuck on it; durable with enhanced design.

Suitable for light or loose materials.

## ROCK BUCKET

The optional  $1.6\text{m}^3/1.9\text{m}^3$  rock bucket is powerful during digging by greatly reducing the cutting resistance of bucket teeth;  
The bucket is more durable by reducing the wear and impact of the rock on the bottom of the bucket. The stability of the whole machine is improved, and the operation is more comfortable.

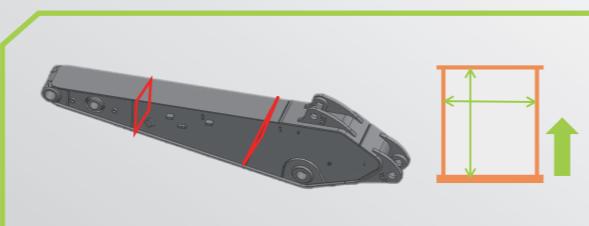

Suitable for high abrasion applications like quarry or rock.

## UNDERCARRIAGE

Larger grounding area for higher stability of the machine;  
Reinforced design for higher durability;  
Long undercarriage with 8/9 track rollers, which are tightly engaged with the chain for stronger bearing capacity;  
The carrier rollers are replaced by track rollers, which are supported at both sides, with stronger bearing capacity and more effective protection for the track.

- ZE335G&ZE375G large-section and forging support work equipment. Compared with the previous generation model, the boom section has increased by 21%, the arm section has increased by 25%.
- The "End of stick" of the ZE335G&ZE375G arm is the widest 414mm, and the pin shaft is increased from 90mm to 100mm, making excavation and breaking more reliable.

## POWERFUL PERFORMANCE:

- ZE335G&ZE375G have the highest drawbar pull compared to other products of the similar level and meet a variety of working environments.
- ZE335G&ZE375G have the highest drawbar pull compared to other products of a similar level and meets a variety of working environments.

Thanks to its powerful performance, ZE335G&ZE375G are suitable for engineering, mining or municipal, it can do any work required by customers. Zoomlion ZE335G & ZE375G will be the biggest strength of customers

↑ Diameter increased by 14%

↑ Displacement increased by 13%

- Large displacement rotary motor, large output torque;
- Mature brand in the industry, high reliability.

## EXCELLENT CAB

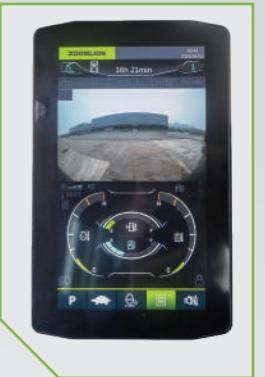

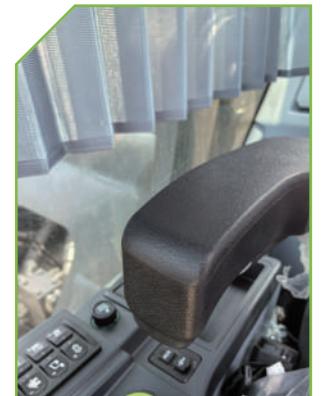

### SPACIOUS CAB

The cab is equipped with a comfortable suspension seat, which can relieve the fatigue of the user. The large-stroke adjustable armrest box, armrest and seat provide the most comfortable state for the user. Large area glass provides the cab with high transmittance. Large space and comfortable working environment are conducive to the improvement of operator productivity.

### USER-CENTERED DESIGN:

ZE335G&ZE375G are equipped with radio as standard and provides an AUX interface to connect mobile devices to the in-vehicle entertainment system. The large touch screen at the front right provides the operator with convenient operation and in-depth technical experience. The multi-function integrated panel on the right side allows the operator to perform one-button start and gives consideration to the operators who get used to using physical keys. The temperature controlled storage box at the right rear provides the operator with a suitable food storage location.

## SAFE EQUIPMENT

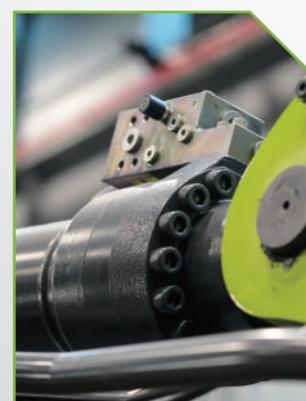

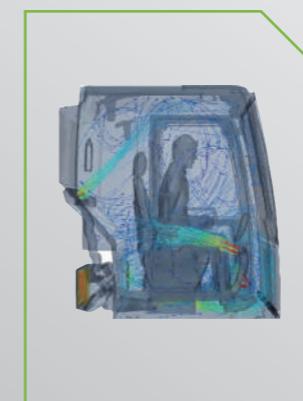

The safety performance of ZE335G&ZE375G meet the latest industry standard. They provide various safety configurations, which minimizes the work safety risks of the personnel near and inside the equipment. The travel alarm lamp, emergency stop switch, high-density anti-skid cover and around view camera provide guarantee for safety.

The ROPS cab adopts a optimized high-strength frame of high impact resistance and durability. Low-noise design makes the working environment more comfortable.

High-power air conditioner and optimized air duct design, which brings more comfortable body feeling.

The aftertreatment unit is placed under the right hood which is normally closed, preventing injuries to personnel in the high temperature area of the aftertreatment unit.

Hose burst valves are standard for the boom and arm to ensure safety in construction and hoisting.

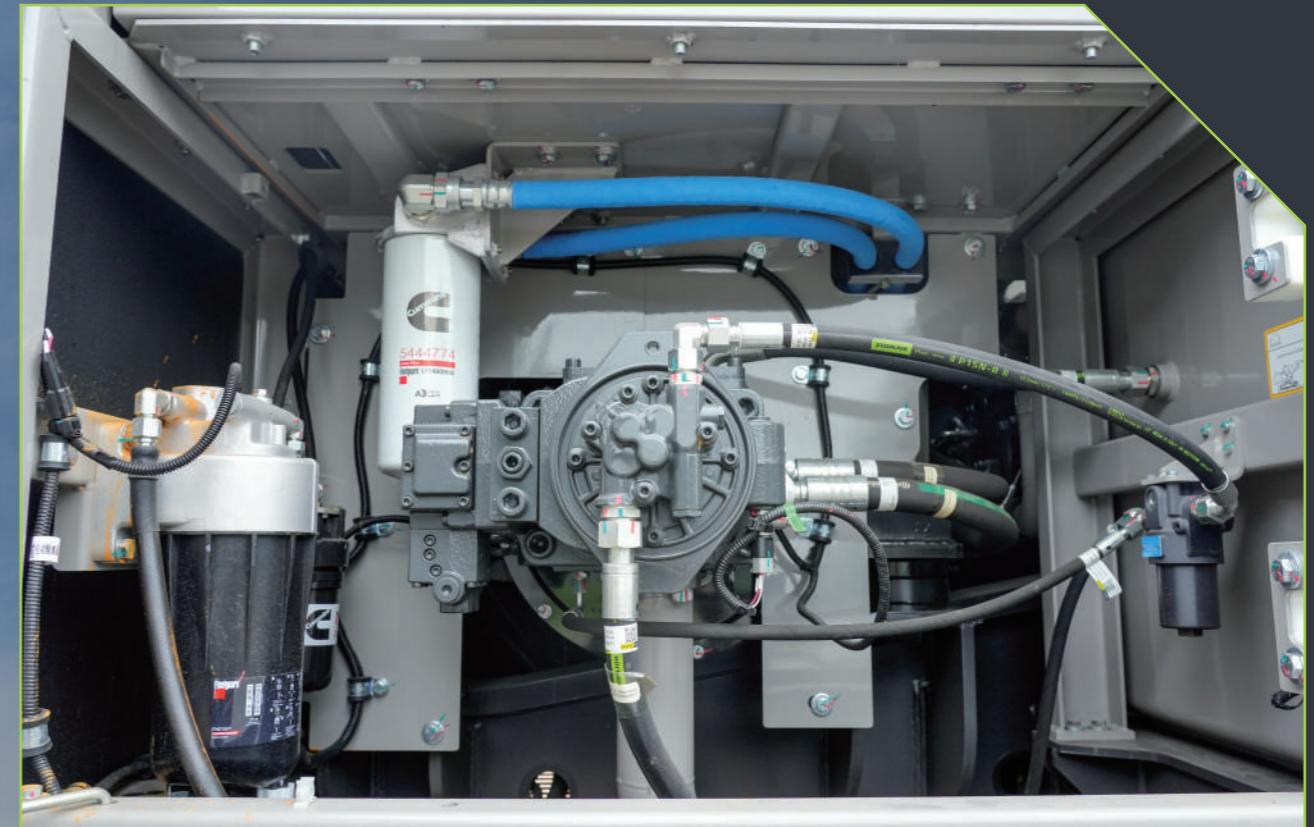

# ATTACHMENTS

Excavators can be used for different functions by installing different attachments, further improving efficiency. Better stability and performance can be achieved by installing Zoomlion attachments. Attachments can be easily replaced by using Zoomlion quick coupler.

## "ONE-STOP" MAINTENANCE

Most of the filters are placed in one location for easy and quick inspection and maintenance.

## ZOOMLION MAINTENANCE

ZOOMLION Maintenance is a maintenance program installed on ZOOMLION machines. It reminds the customer to replace the maintenance parts and record the time of the next maintenance. ZOOMLION service engineer can also maintain the machine through this program. For relevant terms and conditions, please contact your local ZOOMLION dealer.

## DEF TANK AND PUMP

The DEF tank is placed near the toolbox, and a side door can be opened to facilitate the replacement of DEF pump filter element.

# ZOOMLION GENUINE PART

The use of ZOOMLION genuine parts can maintain the best reliability and productivity of the machine, Please purchase parts from ZOOMLION or ZOOMLON authorized dealers.

ZOOMLION spare parts warehouses have prepared sufficient inventory, We will send you the parts you need from the nearest distribution center once we receive your order.

Hydraulic oil filter elements

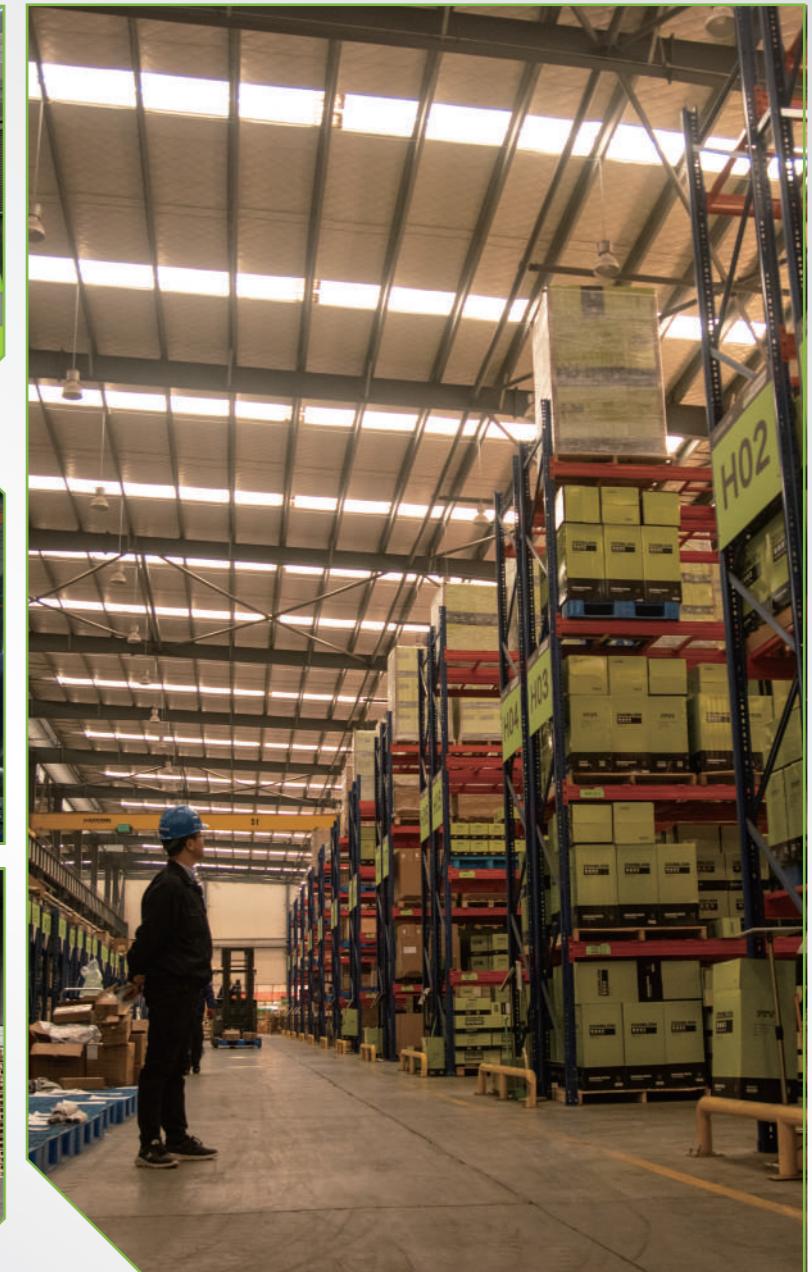

Special hydraulic oil

Fuel filter elements

Zoomlion's service engineers are located in various key countries around the world, According to the distribution of customer! Equipment engineers will be stationed in that country for a long time, if customers need it, our mission will be fulfilled. Every year, Zoomlion's service engineers carry out a service trip to visit new and old customers. We collect reasonable opinions, and listen carefully to customer service requests. We meet the needs of customers in a timely manner and respond to the reasonable needs of customers. We train the operators of each piece of equipment to ensure the stable operation of the equipment.

# CUSTOMER SERVICE

Zoomlion's slogan is "Vision creates future". It is not just a simple slogan, but an unshakable determination to exceed our customer's expectations. Zoomlion has always upheld this belief and tries to implement it in everything that we do for customers. The service we offer to customers is to think about what they think about and worry about what they worry about.

Zoomlion promises that once you choose us, we are ready to respond with the first arrival and solution anytime, anywhere.

Various service content, professional service teams, global service networks and systematic technical support are readily available from Zoomlion for an effective response and solution upon your request no matter where you are in the world and what time it is.

Capacities marked with an asterisk (\*) are limited by hydraulic capacities. See Note 2.

- The mass of slings and any auxiliary lifting devices shall be deducted from the rated load to determine the net load that may be lifted.
- Lift capacities are based on the machine standing on a firm, uniform supporting surface. The user shall make allowances for job conditions such as soft or uneven ground.
- The operator should be fully acquainted with the operator's manual and the operating safety manual furnished by the manufacturer before operating fixe machine.
- NOTE 1 Lift capacities shown are without the power boost feature engaged.
- NOTE 2 Lift capacities shown do not exceed 75% of minimum tipping loads or 87% of hydraulic capacities.
- NOTE 3 The least stable position is over the side.
- NOTE 4 Lift capacities apply only to the machine as originally manufactured and normally equipped by the manufacturer.
- NOTE 5 The total mass of the machine is 33.500kg. Included in this mass are 600mm triple grouser shoes, 6.15 m boom, 2.9 m arm, 3950 kg counterweight, all operating fluids and a 75 kg operator.
- NOTE 6 Lift capacities are in compliance with ISO 10567:2007.
